OUR SOLUTIONS

VRS Technologies provide end to end solutions to establishments by prescribing them annual maintenance Services. The service based solutions is delivered in a two prolonged step. We provide corrective maintenance by deputing a specialist team to resolve issues and troubleshoot problems onsite. All IT related problems are resolved with high priority and due diligence. Systematic checks are performed at regular intervals and logs are maintained to record maintenance data.

Our Annual Maintenance provide security and added peace of mind. For an affordable annual subscription fee establishments / Individuals will be covered against breakdowns (computer systems, networks and Peripherals) and Malfunctions. Computer equipment will be kept at optimal performance throughout the year by our onsite technical team.

VRS provides **ANTIVIRUS** security against all types of malwares such as Keyloggers, Backloggers, Rootkits, Trojan Horses, Worms, Browser helper objects, Phishing attacks, Ramson ware and Spyware. We have all the tools to prevent, detect and remove any potential malware threat. Alongside many companies face threat of malware through Emails, it increase the volume of spam emails and cost extra cost for them. However this happens due to the informed consent of the user .

Recently we have teamed up with **Kaspersky and Eset Antivirus software's** where we can remove these types of threats and makes your work secured.

Protect your data in the laptop or desktops with right Antivirus Software. Consult VRS for best results.

OUR SOLUTIONS

It is very important for any organization to keep the data secure and a backup copy of its original work. Because you cannot retrieve the old data if you do not have a proper backup system in your organization. At VRS we provide all kinds of storage solutions ranging from NAS (Network Attached Storage) and SAS (Storage Area Networks). The purpose of storage device is to recover your lost data in case of corruption of the existing data. It is hereby advised by experts to IT companies that they should have a backup storage for their organization and we promise you to deliver the devices which are cost effective and long run. Buffalo Inc. is our Storage partner for backup solutions and we also provide cost effective packages which include installation assistance and consulting service

We undertake new office setup with all kinds of PABX Setup from Panasonic to AVAYA. VRS have dedicated VoIP engineers who can install, configure and resize your existing PABX infrastructure. Our solutions include Unified Communication features like Voice Mail, Voice Mail to email, Instant Messaging, Fax handling capabilities, Mobility & Video call support. We assure the best and easy manageable PABX at your office with low cost of implementation and high productivity.

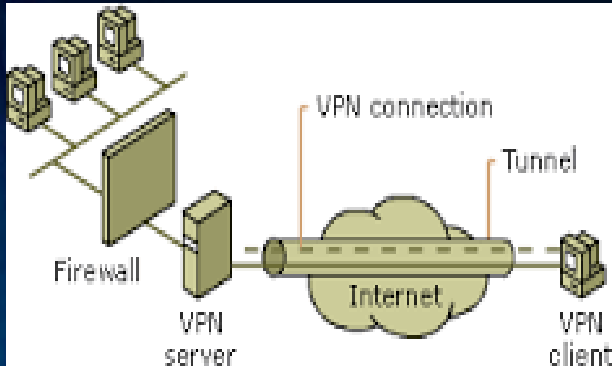

We provide installation of Windows Server 2012, 2008 with Raid configuration. VRS also provides domain hosting services and its renewals.

VRS have excellent engineers who can manage, install and configure Microsoft Office 365 cloud solutions to the companies who are planning to migrate.

OUR SOLUTIONS

VRS Technologies offers a wide range of **Firewall Solutions** for the Corporate companies to prevent the outside threats entering in their network. We install, configure and guide the cost effective solutions for companies suitable to their network. Configuring the strong firewall rules ACL's (Access control Lists) to prevent unknown IP address access can reduce the risk of hacking attempts on your network. We are associated with **CISCO, DELL SONICWALL , FORTIGATE and CYBERROAM** to provide the best security measures to companies from hacking and also VPN's for private access remotely.

Security measures for the company is always needed in order to keep an eye on strangers as well as Staff. VRS now provides excellent support on implementation of **CCTV Cameras, Time Attendance Machine and Access control machines** to make your workplace accessible from anywhere anytime Remotely. We deal with varieties of CCTV Brands depends on the Client requirement and cost. VRS Technologies recently finished the project of security systems in an Warehouse with best price In the market and quality support.

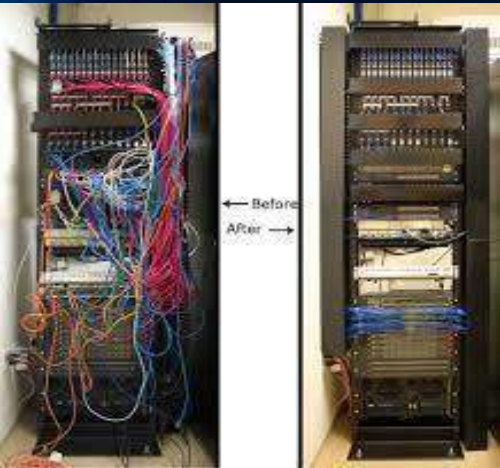

Now access your Office, Home and Warehouse from your Mobile phone Android or IOS With the apps available. VRS can now make your life easy with configuration of the suitable apps on your mobile and get you the access. We will be responsible for DYNDNS domain implementation on your Router / Firewall to provide public access for the CCTV cameras placed inside home, Office or Warehouse.

OUR SOLUTIONS

Is your data crashed ? Did you delete the files mistakenly ? Do you want your Hard Disk Data back ? We can recover all types of Hard disk data for Laptops, Desktop or Data Storage devices for you with advanced software's with maximum recovery. You may consult us for pricing and details.

Imagine you have the urgent requirement for testing a Wireless router which is not responding with IP and You do not know which Cable is connected to it. Will you start removing each cable and shut down your network to find the cable ? What could be better solution? Structured Cabling for an office is the first and foremost important thing, it is the backbone of the network. It makes IT Administrator life easy and helps to find the cables of the particular device and work on it instead of making the entire network go down.

VRS Technologies is specialized in providing the Structured cabling solutions to many corporate companies for their office / data center's to make their life more cherishable. What are you waiting for? Get your Cabling done first with VRS Technologies and work peacefully.

VRS Technologies now can provide contract based or choosing right IT skilled persons to work for your company and increase the productivity. Trust us and we provide you the right candidate for suitable skills you required. You can cut down more than 60% of cost on IT associating with VRS. AMC contract with IT staffing can eventually reduce half of your IT budget annually and you can invest on other things to increase your company's productivity. **We work along with you and help achieve your goals.**
